Introduction
Whenever minimum enrollment requirements are satisfied and Academy resources allow, the courses described in this catalog are offered. Information contained in course descriptions is subject to change in accord with the procedures for curriculum revision outlined in Curriculum and Academic Policies and Procedures of the Indiana Academy for Science, Mathematics, and Humanities.

Definitions

Course Title Codes  Refers to the type of course:

- **CL** College Level – Uses a college textbook and syllabus
- **CP** College Prep – Uses a high school textbook and syllabus
- **DC** Dual Credit – available for Ball State University credit (see page ii)
- **XC** Exploratory Course – studies a specific topic and is a mixture of high school and college levels

Prerequisite  refers to a course or demonstrated knowledge that is required prior to course enrollment.

Co-requisite  refers to courses that are required concurrently.

Credit  refers to the successful completion of a one-semester course that meets as a class a minimum of one hundred and fifty minutes per week.

Permission of Instructor  refers to enrollment after review of transcripts and other relevant information by the course instructor.

Placement  refers to enrollment after review of transcripts and other relevant information by the Director of Academic Affairs, the appropriate academic division chair, or their designees.
Dual Credit Courses (designated as “DC” in the course catalog descriptions) are Indiana Academy courses taught by Academy instructors and have been recognized as equivalent to a Ball State University course. Students who enroll for dual credit may request a transcript from Ball State University which can be transferred to any college or university that accepts BSU credits. Students are responsible for the special dual credit tuition fee. The tuition fee for dual credit varies according to the course. In the list on page iii, all courses underlined will cost $25 per college credit hour. These courses are on the state core library list for automatic transfer between Indiana colleges and universities. The tuition for all courses listed in italics is $250.00 per course. These courses are NOT on the core library list for automatic transfer between Indiana colleges and universities. All tuition fees are waived for students who are on free and reduced lunch. Students should check with a receiving college for their policy on the transfer of Ball State University courses. Students can also check for transfer of credits through the Transfer Evaluation System from CollegeSource at tes.collegesource.com. Applications, directions for enrollment, and other information on dual credit courses can be obtained from the Guidance Office.

**Important items to keep in mind**

1. **Actual courses available for dual credit are subject to change.** Check with the Guidance Office for the most current list of courses.

2. **Fall semester enrollment will take place the first week of the semester and lasts approximately 5 days.** Enrollment for spring dual credit courses will start in December and finish the opening week of classes in January. **You must enroll during these times if you wish to receive dual credit. Ball State University does not allow late or retroactive enrollments.**

3. **Dual credit courses indicated with an asterisk (*) are the second course in a two-semester sequence. Students must enroll in the fall semester course of the sequence in order to qualify for dual credit in the spring semester. Students must enroll and pay another tuition fee for the second course in the sequence during the spring semester. Some courses may have prerequisite requirements. Check with the Guidance Office for an updated and complete list of all prerequisites for dual credit classes.**

4. **Courses labeled “enroll in spring only” are the fall and spring semesters of the Academy class. The two semesters together are equal to one semester of the BSU equivalent class. The dual credit grade is an average of the two semester grades of the Academy class.**

5. **Enrollment for these courses is done in the enrollment period in December and early January.**

*Enrollment in the first course is a prerequisite for enrollment in the second course.*
Dual Credit Courses (designated as “DC” in the course catalog descriptions) are Indiana Academy courses taught by Academy instructors and have been recognized as equivalent to an Ivy Tech course. Students who enroll for dual credit may request a transcript from Ivy Tech, which can be transferred to any college, or university that accepts Ivy Tech credits. Tuition fees for any Dual Credit courses from Ivy Tech listed below are no charge. Students should check with a receiving college for their policy on the transfer of Ivy Tech courses.

**As of 4/21/22
What is an AP Class?
A number of Indiana Academy classes have been approved through an audit process by The College Board to use the label AP or Advanced Placement. These courses are designated as “AP” in the course catalog descriptions. The Academy offers all available AP Science and AP Math courses. Further information about the AP Program can be obtained at http://apcentral.collegeboard.com.

Note – sign-up for the AP exams occurs the fall for most AP courses. There is a penalty charge assessed to the student for changing their AP exam status by dropping the exam or adding the exam. Watch for announcements on specific dates and deadlines.

AP and College Credit
Students who take an AP exam and earn a score of 3 or higher shall receive college credit in that discipline towards their degree if they attend any Indiana public institution of higher education; this includes all two- and four-year schools and any accompanying satellite campuses.

Ball State University Courses
Substitutions
Students are expected to complete their graduation requirements by enrollment in Academy classes whenever possible. When an Academy class for a graduation requirement cannot be scheduled due to a conflict, the student may request permission to substitute the credit by auditing an appropriate Ball State University course. The Assistant Director of Academic Guidance and the Director of Academic Affairs must approve all BSU course substitutions. The audit fee and textbook fee for courses that fall in this category will be covered by the Academy.

Electives
Indiana Academy students are also provided an opportunity to apply for enrollment in elective Ball State University classes. The student may enroll for college (and Academy) credit at the full BSU tuition rate, or they may audit the course for high school credit only. The student is responsible for all fees and course expenses for BSU elective courses. See the Student Handbook for more detailed information about taking Ball State University courses.

Questions concerning enrolling in Ball State University classes or Audit Fee procedures should be directed to the Guidance Office.

Credit
The following conversion rates will be used for the purpose of converting college level credit to Indiana Academy credit:

GRADUATION REQUIREMENTS

Graduating Classes of 2022-2023 and 2023-2024 (26.5 Academy Credits)

Students must carry a minimum of 5.5 credits each semester.

High School Substitutions
Courses that are not taught at the Indiana Academy which would have traditionally been taken by students as 9th or 10th graders may be taken during summer school or through other arrangements. These classes include but are not limited to: PE, Health, Fine Arts, Geometry, Algebra 2, and World Civilization/World History. Approval for these substitutions should be arranged with the Assistant Director of Academic Guidance.

Science: 6 Credits Required
- Two credits in each two-semester sequence of General Biology, General Chemistry, and General Physics, or equivalent college-preparatory courses as determined by the Science Division Chair.
- Integrated Chemistry/Physics courses taken prior to coming to the Academy are not accepted for either Chemistry or Physics requirements by the Academy.
- Four credits in Laboratory Sciences must be from the Academy.
- A student may petition to have a previous laboratory science course accepted to replace a laboratory science course that would otherwise be taken here.

Math: 8 Credits Required
- Two credits in Algebra 1, two in Geometry, two in Algebra 2, and two in courses beyond Algebra 2.
- Three credits must be from the Academy.
- At least one credit in mathematics must be earned each year.
- Any math credits taken in grades 7 or 8 must be shown for high school credit on the home school transcript in order to count for graduation requirements.

English: 8 Credits Required
- One credit in American Literature (Fall semester of junior year).
- One credit in World Literature (Spring semester of junior year).
- Three credits must be from the Academy.
- One elective credit from the Academy.

Social Studies: 6 Credits Required
- Two in World History or World Geography, two in U.S. History, one in Government, and one in Economics.
- Three credits must be from the Academy.

World Languages: 6 or 8 Credits Required
- If taking one language, a student must successfully complete six credits in that language.
- If taking two languages, a student must earn a total of eight credits with four credits in each language.

Fine Arts: 2 Credits Required
Can be obtained from home high school, online high school course providers, BSU, or the Academy.
Health: 1 Credit Required
Can be obtained from home high school, online high school course providers, or BSU (Health Science – HSCI 160). The Academy does not offer a health course.

Phys. Ed.: 2 Credits Required
Can be obtained from home high school, online high school course providers, or BSU (PFW classes with activity component). The Academy does not offer any PE courses.

Computing: .5 Credit Required
Must take CMP03301 (Computer Applications) at the Academy or TEST OUT on the Computer Applications placement test.

Colloquium: 1 Credit Required
• .5 credit Junior year (taken Fall semester).
• .5 credit Senior year (taken Spring semester).

May Term: 1 Credit Required
• .5 credit Junior year.
• .5 credit Senior year.
• Must be obtained while attending the Academy.

Additional Requirements for the Academic Honors Diploma

Earn a grade of a “C” or better in courses that will count toward the diploma.

Complete one of the following:

A. Earn 4 credits in 2 or more AP courses and take corresponding AP exams.
B. Earn 6 verifiable transcripted college credits in dual credit courses from the approved dual credit list.
C. Earn two of the following:
   1. A minimum of 3 verifiable transcripted college credits from the approved dual credit list,
   2. 2 credits in AP courses and corresponding AP exams,
   3. 2 credits in IB standard level courses and corresponding IB exams.
D. Earn a composite score of 1250 or higher on the SAT and a minimum of 560 on math and a 590 on the evidence-based reading and writing section.
E. Earn an ACT composite score of 26 or higher and complete the written essay component.
F. Earn 4 credits in IB courses and take corresponding IB exams.
Public Law 192-2018 amended the graduation requirements for students in the graduating classes (cohorts) of 2023 and 2024 to allow these students to meet graduation requirements by successfully completing a series of Graduation Pathways.

You may complete this option by successful completion of the three parts of the Graduation Pathway. Please note that these parts will be completed as part of the graduation requirements for the Indiana Academy.

The three parts of the Graduation Pathway are:

1. **High School Diploma** - all students at the Indiana Academy complete an Academic Honors diploma.

2. **Learn and Demonstrate Employability Skills** - students at the Indiana Academy are required to complete hours of Service-Based Experience through Community Service, Academy Service or Internships as part of the Academy’s graduation requirements.

3. **Postsecondary-Ready Competencies** - students can meet these competencies in any one of the following ways:
   - Dual Credit courses
   - AP Courses
   - SAT scores above 480 for Evidence-Based Reading and Writing (ERW) and 530 in Math.
   - ACT scores of 18 in English, 22 in Reading, 22 in Math, and 23 in Science. Students must meet at least 2 of the 4 score requirements.

If you want more information about the Graduation Pathway, see the following link: [https://www.in.gov/doe/students/graduation-pathways](https://www.in.gov/doe/students/graduation-pathways)

Please contact Ms. Rebecca Hammons, Assistant Director of Academic Guidance, at rebecca.hammons@bsu.edu (ph. 765-285-8108) if you have any questions.
**REQUIRED COURSES**

Every junior must take **American Literature** the fall semester and **World Literature** the spring semester.

### ENG03101 – American Literature (CL)

**Prerequisite:** None  
**Credit:** 1 credit  
**Offered:** Fall

The American Literature course begins with literature of the New World and ends with contemporary period literature. There is an emphasis on critical thinking, close reading, and the development of writing skills. The course is organized by theme, by genre, or by literary and historical period, depending on the approach of the teacher. Students will have a wide variety of writing assignments, opportunities for oral participation, and other activities connecting literature, history, and culture.

### ENG04221 – World Literature (CL)

**Prerequisite:** ENG03101  
**Credit:** 1 credit  
**Offered:** Spring

This course focuses on the study of poetry, drama, and prose produced by authors of various nationalities of the Western and Eastern worlds from the ancient period to the present. Students explore literary movements and intellectual trends with a continuing emphasis on critical thinking, close reading, and the development of writing skills. They also develop essays and projects that call upon the processes of analysis, synthesis, and evaluation and have opportunities for oral participation. The course is organized by theme, by genre, or by literary and historical period depending on the approach of the teacher.

### ELECTIVES

**Dramatic Literature**

### ENG05139 – Introduction to Theater and Dramatic Literature (CL)

**Prerequisite:** None  
**Credit:** 1 credit  
**Offered:** Fall

Introduction to Theater and Dramatic Literature begins with a study of ancient Greek Theater with particular stress on the nature of tragedy and the principles for tragedy (and drama) proposed by Aristotle in *The Poetics*. The plays *Agamemnon*, *Antigone*, and *The Trojan Women* represent the three major Greek playwrights. The course continues with Roman Theater, primarily the development of Farce and Senecan tragedy. *Everyman* is a major work of the Medieval Period, followed by *Doctor Faustus* as the representative work of the Renaissance. Molière (French comedy) and English Restoration Comedy are considered. The course then takes a short leap to consider the Norwegian playwright Henrik Ibsen, the Russian playwright Anton Chekov, and two British writers, G.B Shaw and Oscar Wilde. The American triumvirate of Eugene O’Neill, Arthur Miller, and Tennessee Williams are represented, followed by works of Samuel Beckett, Athol Fugard, August Wilson, and David Mamet. In addition to studying the plays as literature, the course includes an emphasis on staging and performance practices of each era and the cultures that helped inspire the plays. Although not an acting or a production course, some acting and some attention to stage design (setting and costumes) are included.
ENG05140 – Global Cinema (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall or Spring

Global Cinema provides students with the opportunity to explore the art of film in a global context. Students will analyze the preoccupations and methodologies of filmmakers and their films from nations like France, Germany, Taiwan, Sweden, India, the Czech Republic, and Mexico. Studying the moving image is akin to studying poetry, and students will be asked to challenge and expand their visual literacy and critical thinking skills. We will study materials in film and art theory, philosophy, and cultural studies, and write thesis-based analytical papers in which we apply theory to film analysis and confront the fictions and non-fictional worlds beyond our own. In doing so, we will have the chance to see and to understand ourselves better. The course may have guest lecturers from other departments, like language and history, and, when possible, we will screen films in a BSU screening room.

ELECTIVES
Themes in Literature

ENG05103 – Literature of the Holocaust (CL)

Prerequisite: None
Credit: 1 credit
Offered: Spring

This course offers students the opportunity to investigate a selection of Holocaust literature, including the genres of non-fiction, fiction, poetry, theory and philosophy, and film. Over the course of the semester, we will discuss the question of why the Holocaust should still have relevance to those growing up in the new Millennium, despite the fact that those who witnessed and experienced it have nearly all died. Through an investigation that begins with Hitler’s rise to power, we will analyze the structures of power and subjugation that allowed over six million people to be murdered. We will discuss at length the questions of memory, forgetting, and forgiveness. We will seek to negotiate the very troubling issue of the appropriation of someone else’s experience and motivations for doing so. Group viewings and discussions of films will generate further conversation and ideally lead us to a better understanding of the Holocaust and our individual responsibilities in remembering, forgetting, and passing on the stories of its victims.

ENG05106 – African-American Literature (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall

This course explores the roots of African-American literature and the literary portrayal of the African-American experience in the 19th and 20th Centuries. Through the themes of the African-American struggle for voice, identity and power, the course examines various writers and genres using written composition, oral participation, and critical thinking to engage in ongoing investigation and inquiry. Students analyze folktales, slave narratives, poetry, short stories, and novels by such authors as Frederick Douglass, Harriet Jacobs, Zora Neale Hurston, Ralph Ellison, and Toni Morrison. Literary works are contextualized in sociology and politics, and themes of representation and protest are analyzed in the context of broader human, spiritual, and intellectual themes. Attention to visual arts and music may enhance understanding of African-American history and culture.
ENG05115 – Survey of 19th Century Russian Literature (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall or Spring

The period between 1820 and 1880 is generally accepted as the Golden Age of Russian Literature. It is during this time that masterpieces of Russian literature and art entered the world stage. It is also a period of intense political and social unrest in a country where the vast majority of the population was illiterate and bound under the yoke of an antiquated and cruel system of indentured servitude. At the same time members of the nobility and the Russian Intelligensia grappled with Russia’s identity crisis, galvanized by Peter the Great’s Westernization reforms a century earlier yet bound by cultural and spiritual conservatism by the powerful Russian Orthodox Church. The result of this turmoil is deeply expressed in the literature of the time, full of raw emotion and an understanding of the soul in a state of inner turmoil amid societal instability.

In this course students will be introduced to the important and influential writers of the era, starting with Pushkin, Gogol, Turgenev, Dostoevsky, and Tolstoi. Students will explore through oral participation and written analysis the various themes that pervade Russian literature, including the role of fate, serfdom, Christian symbolism, political thought throughout 19th century Europe, Slavophilism, and many more. Examples of works that may be studied in this course are Queen of Spades and Captain’s Daughter (Pushkin); The Nose and The Overcoat (Gogol); Fathers and Sons (Turgenev); Crime and Punishment and The Double (Dostoevsky); Anna Karenina and Death of Ivan Ilych (Tolstoi). Through these works and an examination of the historical backdrop of Russia in the 19th century, students will be asked to expand their critical thinking skills for investigation and inquiry to gain understanding of the Russian experience which may help to cast light on the Russians of today and their role on the world stage.

The course texts will be covered in their English translations and no knowledge of Russian is required.

ENG05116 – French Literature (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall or Spring

This course focuses on the study of poetry, drama, and prose produced by French and Francophone authors from the 19th Century to the present. Course texts will be in the English translations of their French originals, and no knowledge of the French language is required. Students explore literary movements and intellectual trends with a continuing emphasis on critical thinking, close reading, and the development of writing skills. They also develop response papers and projects that call upon the processes of analysis, synthesis, and evaluation and have opportunities for oral participation. Creative projects inspired by the readings will be included. Students will write analytical and creative response papers for each of the texts. Examples of works that may be studied in this course include Ball of Suet, The Horla, Cyrano de Bergerac, No Exit, The Second Sex, and So Long a Letter. In addition, students will read poetry by nineteenth and twentieth century writers such as Hugo and Baudelaire. The course may also include French and Francophone films. Examples of films that may be studied include La Jetée, Molière, la Belle et la Bête, and Persepolis.

ENG05117 – Critical Approaches to Literature, Freudian and Jungian (CL)

Prerequisite: None
Credit: 1 credit
Offered: Spring

This literary criticism course uses Freudian and Jungian psychology to analyze literature that focuses on the theme of the dual personality. Students delve into what is often labeled as true self vs. the false self, the concept of the “double,” ego vs. alter ego or mirroring personalities, and id, ego, and super-ego. Through psychological and archetypal analysis, the course examines different writers and genres using written composition, oral participation, and critical thinking to engage in ongoing investigation and inquiry. The theories of Freud and Jung are employed to analyze such literary works as Grimm’s Fairy Tales, Dr. Jekyll and Mr. Hyde, Frankenstein, Winesburg, Ohio, A Doll’s House, The Metamorphosis, Lord of the Flies, Heart of Darkness, Faust, The Picture of Dorian Grey, Demian, and Beloved. Students investigate psychological motives, unconscious desires and anxieties, myths and dreams as symbolic projections of people’s hopes, fears, and aspirations as they analyze the underlying human behavior of classical literary characters.
### ENG05133 – Poetry (CL)

**Prerequisite:** None  
**Credit:** 1 credit  
**Offered:** Spring

In this course, students read and analyze poems written in English from the seventh through the twenty-first centuries, organized around such themes as family, nature, love, death, religious experience, and the imagination. Through discussion, formal and informal writing assignments, oral presentations, and a major project, students should develop as analytic and imaginative thinkers and writers while they learn to read poetry with greater understanding and pleasure. Traditional poetic themes are used with written composition, oral participation, and critical thinking for investigation and inquiry.

### ENG05138 – Studies in the Novel (CL)

**Prerequisite:** None  
**Credit:** 1 credit  
**Offered:** Fall

In this course, students will learn about the development of the novel, while sharpening their critical thinking, analytical writing, and close-reading skills. We will examine the way writers from a variety of backgrounds and literary periods transform the novel by exploring new subject matter and form and subverting or building on existing literary traditions. Oral participation, daily reading responses, and literary analysis papers will challenge students to read closely, identify important themes and concepts, assert thesis claims, and prove their arguments through detailed analysis of textual evidence.

### ELECTIVES

**Other**

### ENG05113S1/05113S2 – Creative Writing (CL)

**Prerequisite:** None  
**Note:** Students may enroll in Writing Fiction or Creative Writing at the Academy, but not both.  
**Credit:** 1 credit  
**Offered:** Fall or Spring

Students in this one-semester class write poetry, short stories, plays, and creative non-fiction with opportunities for oral participation. The concept of manipulation of language to convey ideas, feelings, moods, and visual images is the basis of the course. The students become familiar with the standard literary elements through the reading and study of published prose and poetry and are taught to use those elements in their own writing. They learn strategies for evaluating their own writing and the writing of others. Students who are interested in an audience for their creative work and suggestions for improvement and development of their literary styles are encouraged to sign up for this course.

### ENG05123/05124 – AP English Language and Composition (CL)

**Prerequisite:** Permission of English Department. In keeping with College Board policy, this course is open to students who are academically prepared for it. Students prepared to benefit from this rigorous course have already shown an excellent work ethic and strong analytic and academic writing ability.  
**Credit:** 1 credit  
**Offered:** Fall/Spring Sequence

This year-long course, which prepares students to take the AP English Language and Composition exam, requires students to compose timed, evidence-based analytic and argumentative essays, written in response to College Board prompts, as well as to complete many informal writing exercises. Students will also conduct research, work on grammar and style, and learn to analyze the rhetorical strategies in visual texts and in non-fiction writing from many disciplines and historical periods.
ENG05141S1 – Speculative Fiction (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall

Speculative Fiction will engage with prevailing questions of society, identity, history and technology through the lens of science fiction, fantasy, horror and other genres. It will explore how literature uses provocative premises to engage in thought experiments and social critique. It will focus on key topics which will be addressed through a sequence of works, emphasizing comparative analysis and a variety of perspectives. Throughout the class we will engage in discussion and debate about the daily readings and their subject matter, produce analytical work about the material, and develop our own speculative topics which reflect the experiences and concerns which are most relevant to us.

ELECTIVES

English Quarter Courses

ENG05118 – The Short Story (CL)

Prerequisite: None
Credit: .5 credit
Offered: Quarter 3

The short story is sometimes an under-appreciated art form. Within the space of a few pages, an author must weave a story that is compelling, create characters readers care about and drive the story to its ultimate conclusion. This short story quarter course will include many of the best short story writers of all time, authors who have mastered the art of the short story, turning condensed pieces into memorable works of literature. Students will read, analyze, and discuss short stories written in English or famous works that have been translated into English including major authors such as Hawthorne, Melville, Twain, Cather, Ellison, Hughes, Hemingway, Faulkner, Anderson, O’Conner, Salinger, Vonnegut, Munro, Mansfield, Erdrich, Alexie, Conrad, Joyce, Tolstoy, Chekhov, Borges, Garcia, Kafka, and many more.

ENG05143 – Game Studies & Design (CL)

Prerequisite: None
Credit: .5 credit
Offered: Quarter 4

As old as history and as new as the latest release, games have played an outsized role in human culture. The advent of digital games has led to an explosion of artistic experimentation and a competitive industry. This course will introduce students to the academic field of game studies, providing an opportunity to think deeply about games and how they function in contemporary culture. It will also encourage students to become active participants in that culture. Students may pursue one of two tracks: a critical track and a design track, with critical students performing scholarly analysis, and design students working to develop a prototype game.

THIS COURSE IS COUNTED AS AN ACADEMY ELECTIVE COURSE.

HUM02999 – Writing Lab (CP)

Prerequisite: Teacher Recommendation
Credit: .5 credit
Offered: Quarter 1 or 2

This course emphasizes essential structural and stylistic elements of composition, especially the formulation of a thesis statement, development of a theme and argument, and relevant use of logic, detail, textual illustration, and persuasive language. Issues of clarity, grammar, and form will be incorporated. This course does not count as an English credit but may be used for elective credit.
REQUIRED COURSES

SOC203 – American History, 1492-1876 (DC)  *Available for College Credit (see pg. ii)

Prerequisite: None
Credit: 1 credit
Offered: Fall

This course surveys the American historical experience through 1876. Students will examine key events, ideas, personalities and movements from before European exploration to the end of Reconstruction.

*Ball State University offers 3 college credit hours in HIST 201 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SOC204 – American History, 1877-Present (DC)  *Available for College Credit (see pg. ii)

Prerequisite: None
Credit: 1 credit
Offered: Spring

This course surveys the American historical experience since 1877. Students will examine key events, ideas, personalities and movements since the end of Reconstruction.

*Ball State University offers 3 college credit hours in HIST 202 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

ELECTIVES

Topics in History

SOC05101 – Indiana History (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall

This course will examine the history of Indiana through the present day. Major personalities and important events in the political, economic, literary, philosophical, intellectual, educational, and social realms will be explored. Hoosier hospitality will be the norm for discussion—even when asking the age-old question: what exactly is a “hoosier?”

SOC05109 – A Social History of Architecture and Urban Design (CL)

Prerequisite: None
Credit: 1 credit
Offered: Spring

An introduction to the history of architecture and urban design, stressing the relationship between built forms and social functions. The course will provide a historical survey of significant cities and buildings. Urban examples may include Cusco and Cahokia in pre-Columbian America, ancient Babylon, Athens, and Rome, Cistercian medieval communities, and modern Venice, London, Manchester, New York, and Los Angeles. Example buildings may include the walls and ziggurat of Babylon, the Parthenon and Pantheon, Hagia Sophia and the the Great Mosque of Aleppo, the monastery of St. Gall and Basilica of St. Denis, the fortress designs of Vauban and panopticon prisons, and modern architectural monuments including the Eiffel Tower, the Empire State Building, and the Bilbao Guggenheim museum. This will be a hands-on class that will include drawing and model-making as techniques for understanding design.
### SOC05130 – The West in the World (DC)

- **Prerequisite:** None
- **Credit:** 1 credit
- **Offered:** Fall

The West in the World is a survey of the development of Western Civilization since its origins emphasizing key problems, turning points, and recurring themes, especially in the past two centuries. The course emphasizes the civilization that emerged and developed in Europe and spread to the Americas during the past two millennia. The West in the World also focuses on the way peoples around the globe helped to shape Western Civilization and how they felt its influence. Non-Western civilizations have exercised a powerful influence on Western Civilization, and the West has interacted with the rest of the world throughout its history.

*Ball State University offers 3 college credit hours in HIST 150 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

### SOC05138 – Workers in America (CL)

- **Prerequisite:** None
- **Credit:** 1 credit
- **Offered:** Spring

This course will explore the major issues and historical transformations of the American working class. Particular focus will fall on the institution of slavery as a labor system, the early attempts at solidarity, the rise of corporate capitalism, the emergence of labor organizations during the industrial period, the ideologies of the working class, and the impact of downsizing on workers. Specific attention will be given to the roles of gender, race, ethnicity, and technological changes in defining the experiences of the working class.

### SOC05140 – History of World Religions (CL)

- **Prerequisite:** None
- **Credit:** 1 credit
- **Offered:** Fall

This course will explore the development of religions around the world from prehistoric to modern times. The major world religions will be studied, along with religions of the ancient world and of non-literate peoples. Primary sources will be emphasized to understand the key components of various religions. Special emphasis will also be placed on early developments, exploring the interaction between different religions, as well as the relation of religions to the historical time periods through which they develop.

### SOC05147 – The Life and Times of Abraham Lincoln (CL)

- **Prerequisite:** SOC201
- **Credit:** 1 credit
- **Offered:** Spring

This course examines the life of Abraham Lincoln primarily through the lens of his own writings. Students will see how ambition and personal tragedies of his youth impacted his life and mature beliefs; how the tenets of the Whig party shaped his career in Illinois state politics as and a one-term U.S. congressman; how an autodidact established a successful law career; how a commitment to antislavery principles brought national prominence during the sectional crisis and facilitated his rise to the presidency as a Republican; and how a president committed to the preservation of the Union ended up waging a war against American slavery.

### SOC05150 – Themes in Ethnic Studies (CL)

- **Prerequisite:** None
- **Credit:** 1 credit
- **Offered:** Fall

This course will explore the historical development, lifestyles, and cultural patterns of ethnic groups in the United States and the world. Course themes may include a focus on a particular ethnic group or groups, or may use a comparative approach to study the cultural development, political trends, and economic impact of various ethnic or cultural groups, as well as issues of immigration and assimilation. Literary works emanating from the various ethnic groups may also be subject to scrutiny and discussion.
ELECTIVES

Topics in Social Science

SOC301 – Exploring United States Government: Political Theory and Practice (CL)

Prerequisite: Two credits of American History or Senior status
Credit: 1 credit
Offered: Fall or Spring

An exploration of United States government, with particular reference to past and present political theory. Students will be exposed to a wide variety of thinkers and ideas, as both the sources of American law and government and as comparative examples. Connections will be made between theory and practice, and students will be encouraged to think creatively about the nature, history, and present course of American government and politics. Critical thinking and productive civil discourse will be consistently emphasized. (Only one credit can be earned from the Exploring United States Government course series.)

Prerequisite: Two credits of American History or Senior status
Credit: 1 credit
Offered: Spring

An exploration of United States government, with particular attention to the history and role of the Constitution. The Constitution of the United States is not only the law of the land, it is also the fundamental political mechanism under which the nation has achieved unprecedented freedom and prosperity. This course will provide students with both a historical background and a modern working knowledge of the Constitution and the American political system. Discussions will regularly consider how the Constitution applies to current issues. Critical thinking and productive civil discourse will also be consistently emphasized. (Only one credit can be earned from the Exploring United States Government course series.)

ECONOMICS

ECON201 – Elementary Microeconomics (CL)

Prerequisite: Two credits of American History or Senior status
Credit: 1 credit
Offered: Spring

A study of why people specialize as producers and exchange what they produce with others. Includes analysis of how market structure affects prices. Discusses the issue of whether self-interested economic behavior promotes or hinders society. Recommended for students interested in pursuing economics, business or related studies in college

ECON116 – Survey of Economics (CL)

Prerequisite: Two credits of American History or Senior status
Credit: 1 credit
Offered: Fall or Spring

An introduction to important and influential economic theories and circumstances, with specific examples chosen by the instructor. Course topics will include the study of scarcity and economic reasoning, supply and demand, market structures, the role of government, national economic performance, the role of financial institutions, economic stabilization, and trade.
FRN1A/1B – Beginning French 1 (DC)  
*Available for College Credit (see pg. ii)  
**Prerequisite:** None  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  

This course introduces the fundamental elements of the French language. Emphasis is on the development of basic listening, speaking, reading, and writing skills in the context of cultural exploration of the Francophone world. Using authentic resources, students will learn functional vocabulary, be introduced to different cultures, and discover how the French language and culture connects with their own. Students learn to participate in brief conversations, to read and understand words, phrases and short passages in context, and to respond in writing to various stimuli, all while demonstrating cultural awareness.

*Ball State University offers 4 college credit hours each in FR 101 & FR 102 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

FRN2A/2B – Intermediate French 2 (DC)  
*Available for College Credit (see pg. ii)  
**Prerequisite:** French 1 (FRN1B) or permission of instructor  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  

This course builds upon the fundamental elements of the language through extended vocabulary and the introduction of complex grammatical structures. Students will continue to develop listening, speaking, reading, and writing skills in a cultural context. Using authentic resources, students will expand their vocabulary, be introduced to different cultures, and discover how the French language and culture connects with their own. By the end of the course, students should be able to speak, read, write and comprehend French with increasing proficiency while demonstrating cultural awareness of the Francophone world.

*Ball State University offers 3 college credit hours in FR 201 to students who complete FRN2A and 2B. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

FRN3A/3B – Advanced French 3 (DC)  
*Available for College Credit (see pg. ii)  
**Prerequisite:** French 2 (FRN2B) or permission of instructor  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  

This course continues to build upon the fundamental elements of the language through extended vocabulary and more complex grammatical structures. Students will refine listening, speaking, reading, and writing skills in a cultural context. Using authentic resources, students will expand their vocabulary and grammar while studying aspects of different cultures. Students will participate in meaningful class discussions in French about a variety of topics. By the end of the course, students should be able to speak, read, write and comprehend French with increased proficiency while demonstrating a cultural understanding of the Francophone world.

*Ball State University offers 3 college credit hours in FR 202 to students who complete FRN3A and 3B. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

**HIGHER LEVELS OF FRENCH may be taken at Ball State University. The Academy is not responsible for fees associated with these courses. Questions can be directed to the Guidance Office.**
GER1A/1B – Beginning German 1 (DC)  
**Prerequisite:** None  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  
This course is designed to introduce students to the fundamentals of German grammar and to basic vocabulary. Emphasis is on the development of both written and verbal skills. To that end, students participate in activities pertaining to German language and culture in and outside of class. The goal is for students to accomplish the level of proficiency that enables them to communicate accurately and comfortably on a conversational basis and to be able to write in a clear, comprehensible manner in the German language. Students are expected to utilize communication skills such as responding and giving oral directions and commands, making routine requests, understanding and using appropriate forms of address, telling about daily routines and events, asking and answering simple questions and participating in brief conversations, reading isolated words and phrases in a situational context, comprehending words and phrases in appropriate contexts and responding in writing to various topics.  
*Ball State University offers 4 college credit hours per semester in GER 101 and 102 to students who complete both semesters of this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

GER2A/2B – Intermediate German 2 (DC)  
**Prerequisite:** German 1 (GER1B) or permission of instructor  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  
In both semesters of this course, students use the textbook “Stationen,” which focuses on major cities in Germany, Austria, and Switzerland. Each chapter highlights important historical events and characteristics of a particular city and famous people associated with that city. In addition to the cultural aspect, students are introduced to more complex grammar structures and asked to begin incorporating those structures into their writing and speaking in order to achieve the level of proficiency consistent with a second year college level language course. A variety of exercises and activities help to practice the new vocabulary and grammar so that students improve their writing, reading, speaking and listening skills while learning about German culture, history, and literature.  
*Ball State University offers 3 college credit hours in GER 201 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

Third-year German is not offered at the Academy. To fulfill their language requirement students can take third-year German at Ball State. The Academy is not responsible for fees associated with courses beyond third-year German.

JPN1A/1B – Beginning Japanese 1 (DC)  
**Prerequisite:** None  
**Credit:** 1.25 credits per semester  
**Offered:** Fall/Spring Sequence  
The Japanese I course is designed for beginners to acquire basic working knowledge of spoken as well as written Japanese. Students are expected to be able to make statements, ask and answer questions about basic daily routines and events and to be able to read and write those sentences using the two sets of alphabet, called hiragana and katakana, and basic Chinese characters, called kanji. Elements of Japanese culture, history and geography are regularly integrated throughout the course of the semester.  
*Ball State University offers 4 college credit hours in JAPA 101 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*
JPN2A/2B – Intermediate Japanese 2 (DC)

Prerequisite: Placement or Japanese 1 (JPN1B)
Credit: 1.25 credits per semester
Offered: Fall/Spring Sequence

The Japanese II course is designed for the fuller development of the working knowledge of spoken and written Japanese acquired in the level one course. Students are also expected to be able to ask questions regarding routine activities, participate in conversations on a variety of topics, relate a simple narrative about a personal event or experience, interact in a variety of situations to meet personal needs, understand main ideas and facts from simple texts, read aloud properly, and write briefly in response to given situations. Elements of Japanese culture are regularly integrated throughout the course.

*Ball State University offers 4 college credit hours in JAPA 102 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

JPN3A/3B – Advanced Japanese 3 (DC)

Prerequisite: Japanese 2 (JPN2B) or permission of instructor
Credit: 1.25 credits per semester
Offered: Fall/Spring Sequence

The Japanese 3A/3B course is the continuation of Japanese 1A/1B and 2A/2B, which aims at the further development of the ability of the students in using the four skills of the Japanese language. This is a full immersion course. Students are required to discuss the contents of culture lessons in Japanese, thus integrating the learning of the culture with that of the language. Over the year, students gain speaking skills to give presentations in Japanese, participate in academic discussions, take job interviews and work in a Japanese environment. Students will also read authentic Japanese materials such as newspapers and novels, and regularly watch Japanese media. With the completion of the “Genki” series, they will have acquired a total of 317 kanji characters by the end of their course, which allows them to read any material in Japanese with the help of a dictionary. They should be ready to take JLPT (Japanese Language Proficiency Test) 3 Level at the end of the year, and be eligible for a third-year university level in Japanese.

*Ball State University offers 4 college credit hours in JAPA 201 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

RUS1A/1B – Beginning Russian 1 (CL)

Prerequisite: None
Credit: 1.25 credits per semester
Offered: Fall/Spring Sequence

This course focuses on the skills required for speaking, reading, writing and comprehending Russian. Particular attention is given to acquiring an understanding of the fundamental grammar structure of Russian, together with pronunciation, intonation, and mastery of the Cyrillic alphabet. In addition, students are expected to utilize communication skills such as responding to and giving oral directions and commands, understanding simple conversations, participating in discussions and conversations on an elementary level in the target language. At the conclusion of the 1A/1B sequence, students will have learned all six cases and their inflectional endings, as well as basic vocabulary necessary for everyday communication. Additionally, students will be exposed to Russian literature and early Russian history with the ultimate goal of understanding the Russian people and their rich heritage.

SPN2A/2B – Intermediate Spanish 2 (CL)

Prerequisite: Placement or Spanish 1 (SPN1B)
Credit: 1.25 credits per semester
Offered: Fall/Spring Sequence

The second course in the Spanish language series, this course represents a continuation of grammar, vocabulary, pronunciation and listening with emphasis on both reading and writing. In addition, special emphasis is placed upon the language as an integral component of Spanish and Hispanic cultures.

Students are expected to be able to ask questions regarding routine activities, participate in conversations on a variety of topics, relate a simple narrative about a personal event or experience, interact in a variety of situations to meet personal needs, understand main ideas and facts from simple texts, read aloud properly, and write briefly in response to given situations.
SPN3A/3B – Advanced Spanish 3 (DC)  *Available for College Credit (see pg. ii)

Prerequisite: Placement or Spanish 2 (SPN2B)
Credit: 1.25 credits per semester
Offered: Fall/Spring Sequence

Building upon and drawing distinctions from skills established within the grammar, vocabulary, pronunciation, listening and culture curriculum of the previous courses, this course focuses on listening (Spanish film, news broadcasts, etc.), speaking (oral presentations), reading comprehension and writing (summarization of reading passages, essays). Students are expected to respond to factual and interpretive questions and interact in a variety of social situations, read for comprehension, read short literary selections of poetry, plays, and short stories, complete authentic forms and documents and take notes that require familiar vocabulary and structures, write paraphrases, summaries, and brief compositions, describe different aspects of the culture, and participate appropriately.

*Ivy Tech Community College offers 3 college credit hours per semester in SP 101 and 102 to students who complete SPN 3A and 3B. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.
MAT02999/03000 – Geometry (CP)
Prerequisite: Algebra I
Credit: 1 credit per semester
Offered: Fall/Spring Sequence

In this two-semester sequence, geometry students examine the properties of two- and three-dimensional objects. Proof and logic, as well as investigative strategies in drawing conclusions, are stressed. Properties and relationships of geometric objects include the study of (1) points, lines, angles and planes; (2) polygons, with a special focus on quadrilaterals, triangles, right triangles; (3) circles; and (4) polyhedral and other solids. Use of graphing calculators and computer drawing programs is included.

This course is available through Burris Laboratory School and meets 5 days a week.

MAT03001/03002 – Advanced Algebra/Trigonometry 1, 2 (CP)
Prerequisite: Placement
Credit: 1 credit per semester
Offered: Fall/Spring Sequence

This course covers topics that include solutions of systems of equations and inequalities, simplifying algebraic expressions, radicals, polynomial, exponential and logarithmic functions, circular and trigonometric functions including trigonometric identities and the trigonometry of right triangles. This course serves as preparation for Precalculus.

MAT03101/03102 – Precalculus 1, 2 (DC) *Available for College Credit (see pg. ii)
Prerequisite: Placement
Credit: 1 credit per semester
Offered: Fall/Spring Sequence

This course provides a thorough, careful study of basic precalculus topics. Topics include linear and quadratic functions, polynomial functions, inequalities, graphs of functions, exponential and logarithmic functions, trigonometric functions and equations, and triangle trigonometry.

Students completing this course will generally choose two courses from among Calculus, Statistics, and Finite Mathematics for the senior year. Exceptional students may be allowed to enroll in Advanced Placement Calculus AB.

*Ivy Tech Community College offers 3 college credit hours in MATH 136 to students who complete both semesters of this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

MAT03311/03312 – Precalculus for Advanced Placement 1, 2 (DC) *Available for College Credit (see pg. ii)
Prerequisite: Placement
Credit: 1 credit per semester
Offered: Fall/Spring Sequence

This course provides the rigorous development of precalculus topics necessary to prepare students for studying Advanced Placement Calculus. The first semester will include the study of polynomial, exponential, logarithmic and trigonometric functions and their graphs. Topics for the second semester include triangle trigonometry, polar coordinates, vectors, sequences and series, analytic geometry, parametric equations, and limits. Elementary proof techniques will be employed throughout the course.

Successful completion of this course will generally result in enrollment in Advanced Placement Calculus AB or BC the senior year.

*Ivy Tech Community College offers 3 college credit hours per semester in MATH 136 and MATH 137 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

</table>
**MAT04514 – Statistics (DC)**  
*Available for College Credit (see pg. ii)*

**Prerequisite:** Algebra II  
**Credit:** 1 credit  
**Offered:** Fall or Spring

In this course, students do activities that guide them to discover statistical concepts, explore statistical principles, and apply statistical techniques. The course focuses on developing statistical reasoning through analysis of genuine data. The students will learn to describe the distribution of a variable, compare the distributions of two or more variables, and describe the relationship between two variables. The course introduces the issues of sampling, surveys, and experiments. Probability is introduced through simulations and these simulations build an understanding of the Central Limit Theorem. Inferences from data include confidence intervals and significance tests for a proportion, a mean, the difference between two proportions, and the difference between two means, both for matched pair designs and independent samples. Exploratory data analysis, data production issues and interpretation of results by the students are emphasized throughout.

*Ball State University offers 3 college credit hours in MATH 181 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

**MAT04515 – Quantitative Reasoning (DC)**  
*Available for College Credit (see pg. ii)*

**Prerequisite:** Algebra II or permission of Division Chair  
**Credit:** 1 credit  
**Offered:** Spring

This course exposes students to a variety of practical applications in order to further develop problem-solving skills and other fundamental mathematics skills. Elementary probability theory and basic statistics are core topics of the course. Additional topics are selected from linear programming, mathematics of finance, voting methods, and graph theory.

*Ball State University offers 3 college credit hours in MATH 125 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

**ADVANCED ELECTIVES**

**MAT04522 – Discrete Mathematics (CL)**

**Prerequisite:** Precalculus for Advanced Placement 2 or the equivalent  
**Credit:** 1 credit  
**Offered:** Fall

The course is a survey of discrete mathematical topics selected from among logic, set theory, cardinality of sets, number systems, graph theory, combinatorics, recursion, and discrete probability. This course uses various proof techniques including mathematical induction and stresses algorithmic thinking and precise mathematical expression.

**MAT04825 – AP Statistics (DC)**  
*Available for College Credit (see pg. ii)*

**Corequisite:** Precalculus for AP 2 (MAT03312) or permission of Division Chair  
**Credit:** 1.25 credits  
**Offered:** Spring

This course meets four days a week and covers the College Entrance Examination Board’s syllabus in Advanced Placement Statistics. It is organized around the four broad conceptual themes of exploring data, planning a study, producing models using probability and simulation, and statistical inference. Exploratory analysis of data uses graphical and numerical techniques. An appropriate graphing calculator, such as the TI-84, and appropriate statistical software, such as Minitab or SAS, are used. The variety of associations among variables permeates most of statistics. Exploring these types of associations will engage critical thinking, problem solving, and creative abilities.

*Ball State University offers 3 college credit hours in MATH 181 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*
MAT04832 – Linear Algebra (DC)  
Prerequisite: AP Calculus AB 2 (MAT04124) or AP Calculus BC 1 (MAT04133)  
Credit: 1.25 credits  
Offered: Fall  
This course meets four days a week and includes the solution of linear systems, vector equations, linear transformations in two- and three-dimensional space, matrices and determinants, vector spaces, inner product spaces, eigenvalues and eigenvectors and related topics. There are some computational projects.  
*Ball State University offers 4 college credit hours in MATH 217 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

MAT04833 – Multivariable Calculus (DC)  
Prerequisite: AP Calculus BC 2 (MAT04134)  
Credit: 1.25 credits  
Offered: Spring  
This course meets four days a week and covers multidimensional calculus with applications. The topics include higher dimensional analytic geometry, vector-valued functions, motion, curvature and torsion, partial differentiation, directional derivatives, optimization, multiple integration in rectangular, cylindrical and spherical coordinates, vector fields, divergence, curl, line and surface integrals, work, flux, flow, Green’s theorem, the divergence theorem, Stokes’ theorem, and the fundamental theorem for line integrals. Students work with graphing calculators and a computer algebra package.  
*Ball State University offers 4 college credit hours in MATH 267 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

MAT04834 – Differential Equations (DC)  
Prerequisite: AP Calculus BC 2 (MAT04134) or concurrent enrollment in AP Calculus BC 2 with the permission of the Math/CS Division Chair  
Credit: 1 credit  
Offered: Spring  
This course is an introduction to ordinary differential equations and boundary value problems. The topics include first order linear, separable, exact, and homogeneous equations with applications in biology, chemistry, physics, and finance; numerical methods for first order equations; second order linear homogeneous and non-homogeneous equations, including the methods based on reduction of order; undetermined coefficients and variation of parameters with applications in physics; \( n \)-th-order linear equations and systems of first order linear equations including use of eigenvectors and eigenvalues.  
*Ball State University offers 3 college credit hours in MATH 374 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.
COMPUTER SCIENCE

CMP03301 – Computer Applications (CP)

Prerequisite: None
Credit: .5 credit
Offered: Fall

This hybrid course is a brief introduction to currently popular and useful elementary software applications. Students will become proficient with using word processing, spreadsheet, and presentation programs. The course will also provide orientation to students to the Academy’s learning management system (LMS) software. The online portion of the class will be completed by students outside of class time using lesson videos and corresponding assignments that are organized on the LMS. Students will be present in a face-to-face classroom one day per week for additional instruction, supervised work time, and unit tests.

CMP04101 – Web Page Development (XC)

Prerequisite: None
Credit: 1 credit
Offered: Fall

This course is the study of Web Page concepts. The students will learn the current versions of HTML, CSS and current software packages to develop Web Pages. Students will have the opportunity to work with a client and will learn how to post a web page live on the Internet.

CMP04201 – Introduction to Programming (CL)

Prerequisite: None
Credit: 1 credit
Offered: Fall and Spring

This course is an introduction to computer programming (C++) and is designed for students with little or no previous programming experience. Students will learn to program using a top-down design, structured, and object-oriented approach. Topics will include using basic variables, loops, strings, arrays, functions, and basic input/output files.

CMP04202 – Visual Programming (DC)

Prerequisite: Introduction to Programming (CMP04201) suggested or experience in structured programming language or permission of instructor
Credit: 1.25 credit
Offered: Fall

This course is an introduction to visual programming using a high-level language (Python) and an established programming paradigm. Developing problem solving skills and programming techniques will be emphasized. Skills learned in this course will be applied to computer gaming and software development.

*Ball State University offers 4 college credits in CS 120 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.
**CMP04501/04502 – AP Computer Science A 1, 2 (DC)**

*Available for College Credit (see pg. ii)*

**Prerequisite:**
- Fall: Introduction to Programming (CMP04201) or experience in structured programming language and permission of instructor
- Spring: Successful completion of first semester AP Computer Science A.

**Credit:**
1.25 credits

**Offered:**
Fall/Spring Sequence

This course uses a high level, object oriented programming language (Java). Students will learn syntax and the development of algorithms. The emphasis is on developing problem-solving skills and programming techniques. This course is designed for students with a computer programming background who desire a more challenging programming course. Semester 1 topics will include defining variables, primitive types vs. objects, methods, strings, if/else conditionals, loops, one- and two-dimensional arrays, array lists, inheritance, interfaces, abstract classes, basic input/output files and using applets, error handling, testing and debugging. Semester 2 topics will include using data structures such as linked lists, stacks, queues, binary trees, sequential and binary searching, sorting, traversing trees, and hashing. Laboratory activities include the required AP Computer Science A lab exercises.

Successful completion of this course will prepare the student for the Advanced Placement Computer Science A exam.

*Ball State University offers 4 college credit hours in CS 121 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

**CMP04605 – Introduction to Virtual Reality (CL)**

**Prerequisite:**
Introduction to Programming (CMP04201) or permission of instructor

**Credit:**
1 credit

**Offered:**
Spring

This course will provide an introduction to the study of virtual reality. Students will explore the basics of virtual reality, 3D graphics, and programming in the world of virtual reality.
Students will be placed in the appropriate physics level based on their math enrollment. Juniors may wish to delay taking physics until their senior year in order to build their math abilities.

For students who have no credits in General Physics, a comprehensive physics test, covering the subject matter of the two semesters of General Physics at the Academy, will be given to those students attempting to place out of the lecture portion of the course. This test will include questions to satisfy the Indiana physics standards and additional questions to satisfy the higher expectations of the Academy. The test will be given before classes start in the fall and may be taken only once.

There are two possible outcomes of this test:

- The student does not pass the exam, and thus is assigned to a physics course as the Academy math placement test dictates.
- The student does pass the exam, and thus can –
  - elect to not place out and thus take the General Physics course and that earned grade will appear on the transcript
  - use the spare credit to take another Academy course. If this path is chosen, they will be required to take and pass both semesters of the lab portion of the General Physics course
  - take AP Physics I
  - take AP Physics C (if the student is concurrently enrolled in Calculus BC)

Passing this comprehensive physics placement test (upon completion of the laboratory requirement), or a higher-level class, will satisfy a student’s survey physics course requirement for their Indiana Academy diploma.

| SCI03111/03112 | AP Physics I (DC)               | *                          | Precalculus and math placement test score or permission of instructor or co-requisite enrollment in Academy Pre-calculus for AP.             | AP Physics I Lab (SCI3111L/3112L)                                            | 1.5 credits per semester |

General Physics I-II is a high school level course which provides an introduction to the basic principles of physics. Topics include motion, force, energy, heat and thermodynamics, wave motion, sound, light, electricity and magnetism and, as time allows, topics in modern physics. A basic knowledge of algebra and geometry is required for this course. Mathematics in the course serves as a tool to define and describe physical relationships and the logical progression of ideas. The lab portion of the course models the scientific process, and gives students hands on experience in dealing with many of the concepts covered in the course.

*Ball State University offers 3 college credit hours in PHYC 100 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

AP Physics I proceeds at an accelerated pace and provides a physical introduction to the main principles of physics, which include Newtonian mechanics, oscillations and sound, electricity and magnetism, kinetic theory and thermodynamics, fluids, optics and modern physics. Emphasis will be given to linear and rotational applications to kinematics, forces, and momentum, as well as energy and power, gravitation, harmonic motion, and introductory electric circuits. Knowledge of geometry, algebra and some trigonometry is required for this course. Laboratory investigations emphasize concepts and inquire in order to develop proficiency in problem solving and in the application of fundamental principles to a wide variety of situations. This course is intended for those students whose career goals include life or earth science, pre-medicine, as well as other fields not directly related to science. Students will prepare for and are encourage to take the AP Physics I exam in May.

*Ball State University offers 3 college credit hours in PHYC 110 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.
SCIENCE: PHYSICS EMPHASIS (Continued)

SCI03113/03114 – AP Physics II (DC)
*Available for College Credit (see pg. ii)

| Prerequisite: | AP Physics I or permission of the instructor |
| Co-requisite: | AP Physics II Lab (SCI3113L/3114L) |
| Credit: | 1.5 credits per semester |
| Offered: | Fall/Spring Sequence |

AP Physics II builds upon what was learned in AP Physics I, and will emphasize fluid statics and dynamics; thermodynamics and kinetic theory; PV diagrams and probability; electrostatics, electric circuits with capacitors, magnets and electromagnetism; physical and geometric optics, and various topics in modern physics. Knowledge of geometry, algebra and some trigonometry is required for this course. Laboratory investigations emphasize concepts and inquiry in order to develop proficiency in problem solving and in the application of fundamental principles to a wide variety of situations. This course is intended for those student whose career goals include life or earth science, pre-medicine, as well as other fields not directly related to science. Student will prepare for and are encouraged to take the AP Physics II exam in May.

*Ball State University offers 3 college credit hours in PHYC 112 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SCI04102/04103 – AP Physics C (DC)
*Available for College Credit (see pg. ii)

| Prerequisite: | Fall: Completion of a General Physics course and/or concurrent enrollment in AP Calculus BC or permission of the Science Division Chair. 
Spring: Successful completion of first semester AP Physics C. |
| Co-requisite: | AP Physics C Lab (SCI4102L/4103L) or permission of instructor |
| Credit: | 1.5 credits per semester |
| Offered: | Fall/Spring Sequence |

This calculus-based physics course forms the first part of the college sequence, normally extending over two or three semesters. Linear and Rotational Mechanics, Wave Motion, and Heat for the first semester, and Electricity, Magnetism, Optics and Thermodynamics for the second semester. Strong emphasis is placed on solving a variety of challenging problems with an emphasis on analysis in both the laboratory and classroom. Calculus is used freely in formulating principles and in solving problems. This course serves as the foundation for students whose career goals include the physical sciences or engineering, but has many applications to geo-physics, bio-physics and other interdisciplinary fields. Students will prepare for and are strongly encouraged to take both the College Board AP Physics C: Mechanics exam and the College Board AP Physics C: Electricity & Magnetism Exam in May.

*Ball State University offers 5 college credit hours each semester in PHYC 120 and 122 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SCI04107Q – Physics II: Modern Physics (XC)

| Prerequisite: | A General Physics Course |
| Co-requisite: | Physics II: Modern Physics Lab (SCI4107L) and AP Calculus AB 1, 2 (MAT04123/04124) or above |
| Credit: | 5 credit |
| Offered: | Quarter 4 |

The course includes Einstein's theories of relativity, quantum physics, quantum mechanics, and atomic physics. Other topics covered include properties of nuclei, nuclear models, radioactivity, nuclear fission and fusion, particles and anti-particles, conservation laws, quarks, and standard model. Laboratory work will enhance the concepts learned in class. This course is intended for students interested in majoring in science, medicine, or engineering.

SCI04116 – Physics II: Introduction to Engineering (XC)

| Prerequisite: | None |
| Co-requisite: | Physics II: Introduction to Engineering Lab (SCI4116L) |
| Credit: | 1.5 credits |
| Offered: | Fall |

This course will provide students with an introduction to engineering as a profession through case studies and hands-on projects in several areas of engineering, including robotics. In particular, students will work in teams, applying engineering principles, to build and test simple robots. Students will have the opportunity to participate in a robotics competition.
SCI04117 – Physics II: Projects in Engineering (XC)

Prerequisite: One semester of physics; Intro to Engineering or instructor permission
Co-requisite: Physics II: Projects in Engineering Lab (SCI4117L)
Credit: 1.5 credits
Offered: Spring

Students will develop and work on engineering-related projects that have a strong community service component. The class will be divided into small groups and work on projects based upon common interest. All projects will be required to demonstrate development and application of engineering skills in addition to fulfilling an identified need in the community. The class will have a regularly assigned class period but much of the work will be completed outside of regular class time. Project groups will meet with the instructor on a regular basis.
For students who have no credits in General Chemistry, a comprehensive chemistry test, covering the subject matter of the two semesters of General Chemistry at the Academy, will be given to those students attempting to place out of the lecture portion of the course. This test will include questions to satisfy the state chemistry standards and additional questions to satisfy the higher expectations of the Academy. The test will be given before classes start in the fall and may be taken only once.

There are two possible outcomes of this test:

- The student does not pass the exam, and thus takes General Chemistry
- The student does pass the exam, and thus can:
  - elect to not place out and thus take the General Chemistry course and that earned grade will appear on the transcript
  - use the spare credit to take another Academy course. If this path is chosen, they will be required to take and pass both semesters of the lab portion of the General Chemistry course.
  - take AP Chemistry (if concurrently enrolled in AP Calculus AB or higher)

Passing this comprehensive chemistry placement test (upon completion of the laboratory requirement), or a higher-level class, will satisfy a student’s survey chemistry course requirement for their Indiana Academy diploma.

### SCI03201/03202 – Chemistry I: General Chemistry 1 & 2 (DC)  
*Available for College Credit (see pg. ii)*

**Prerequisite:**  
Fall: Algebra I and Geometry  
Spring: Successful completion of first semester General Chemistry or permission of Science Division Chair.

**Co-requisite:**  
Chemistry I: General Chemistry Lab (SCI3201L/3202L) and Advanced Algebra/Trigonometry 1, 2 (MAT03001/03002) or higher.

**Credit:**  
1.5 credits per semester

**Offered:**  
Fall/Spring Sequence

General Chemistry examines the concepts of the structure of matter, the states of matter, chemical bonding and reaction types, stoichiometry, equilibrium, acid-base theory, kinetics, thermodynamics, oxidation-reduction, and an introduction to organic chemistry. The course emphasizes chemical calculations and the mathematical formulation of principles. Laboratory work emphasizes both qualitative and quantitative experiences and introduces the use of technology in the lab.

*Ball State University offers 3 college credit hours in CHEM 100 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*

### SCI04204/04205 – AP Chemistry (DC)  
*Available for College Credit (see pg. ii)*

**Prerequisite:**  
Fall: Successful completion of two semesters (or equivalent) of General Chemistry or permission of instructor.  
Spring: Successful completion of first semester AP Chemistry or permission of Science Division Chair.

**Co-requisite:**  
Juniors: AP Calculus/AB (MAT04123/04124) or higher or permission and AP Chemistry Lab (SCI4204L/4205L)  
Seniors: Pre-Calculus for AP (MAT03311/03312) or any 4000-level math course or permission and AP Chemistry Lab (SCI4204L/4205L)

**Credit:**  
1.5 credits per semester

**Offered:**  
Fall/Spring Sequence

Advanced Placement Chemistry is an accelerated course designed to review and extend the concepts introduced in General Chemistry, and it is comparable to a course for science majors in freshman college chemistry. Advanced laboratory work is emphasized. This course is designed for students who hope to advance place in college chemistry and/or whose career goals include science, engineering or the medical sciences. Students will prepare for and are encouraged to take the AP Chemistry exam in May.

*Ball State University offers 4 college credit hours in CHEM 111 and 112 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.*
SCI04209 – Chemistry II: Intro to Organic & Biochemistry (CL)

Prerequisite: General Chemistry
Co-requisite: Chemistry II: Introduction to Organic and Biochemistry Lab (SCI4209L)
Credit: 1.5 credits
Offered: Fall

In this course, the traditional aspects of organic chemistry, which include nomenclature, structure, bonding, and functional groups are examined but with emphasis on reactions and reaction pathways. The goal is to educate students to think independently about organic chemistry. Students are expected to analyze problems, sort facts, reason by analogy, and look for patterns. Laboratory work is carried out at both the micro-scale and macro-scale level. Selected topics in biochemistry will be covered, and students will be exposed to biochemical techniques in the laboratory. This course is intended for students whose college goals include biology, chemistry, or the medical sciences.

SCI04250 – Chemistry II: Forensic Science (XC)

Prerequisite: 1-year course in chemistry with laboratory, trigonometry or permission of instructor
Co-requisite: Chemistry II: Forensic Science Lab (SCI4250L)
Credit: 1.5 credits
Offered: Spring

Forensic Science is a first course in the forensic application of both science and technology. Topics will be taught on a case history approach to expose students to “front-page” cases of past and present. This course will place major emphasis on exposing students to biological, chemical, and physical methods of analyzing crime scene evidence. Students will use information and evidence data from case histories and case readings, as well as the compilation of information from the internet, to explore and learn about the forensic applications of science and technology. Topics in this course will include: the history and development of forensic science, security of a crime scene and collection of physical evidence, trace evidence, fire investigations and explosives, fingerprints, firearms and tool marks, document examination, and computer forensics. This course will place a major emphasis on the newest and best methods to gather, analyze, and interpret data needed to solve all types of crimes. In addition, students will explore the disciplines of forensic science and college courses and majors necessary to obtain a career in the forensic sciences.
SCI04301/04302 – AP Biology (DC)  
*Available for College Credit (see pg. ii)

**Prerequisite:**  
Fall: Successful completion of two semesters (or equivalent) of General Biology and General Chemistry or permission of instructor  
Spring: Successful completion of first semester AP Biology or permission of the Science Division Chair.

**Co-requisite:**  
AP Biology Lab (SCI4301L/4302L)

**Credit:**  
1.5 credits per semester

**Offered:**  
Fall/Spring Sequence

This Advanced Placement course provides an accelerated, comprehensive, and thorough overview of the field of biology in preparation for the AP Biology exam. The course covers biological chemistry, cell biology, Mendelian genetics, evolutionary theory and principles, and an overview of the diversity, structure and ecology of organisms. Laboratory activities follow the required AP Biology lab exercises and other lab activities. Students will prepare for and are encouraged to take the AP Biology exam in May.

*Ball State University offers 4 college credit hours in BIO 111 and 112 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SCI04304 – Biology II: Microbiology (DC)  
*Available for College Credit (see pg. ii)

**Prerequisite:**  
One year laboratory biology

**Co-requisite:**  
Biology II: Microbiology Lab (SCI4304L)

**Credit:**  
1.5 credits

**Offered:**  
Fall

The history of bacterial discovery, the scope of bacterial effects, biotechnology, and the classification of micro-organisms are studied. The course includes the study of the structure, function, and ecology of microbes and viruses. Basic aseptic and sterile techniques for isolating, culturing, and identifying bacteria are discussed and practiced in the laboratory as a prelude to learning fundamental staining techniques, biochemical tests, etc. that are used in the identification of unknown bacteria. Some consideration is given to the medical concerns related to bacterial and viral pathogens.

*Ball State University offers 5 college credit hours in BIO 113 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SCI04305/04306 – Biology II: Human Anatomy and Physiology (CL)

**Prerequisite:**  
Fall: One year biology  
Spring: Successful completion of first semester Biology II: Human Anatomy and Physiology or permission of Science Division Chair.

**Co-requisite:**  
Biology II: Human Anatomy and Physiology Lab (SCI4305L/4306L)

**Credit:**  
1.5 credits per semester

**Offered:**  
Fall/Spring Sequence

Using an integrated text, this course covers material in six parts, which include: levels of organization, support and movement, control and regulation, fluids and transport, environmental exchange, and the continuity of life. Clinical topics that relate to personal and family health concerns are interwoven with a consideration of the relationship of structure to function. The concepts of anatomical and physiological processes are explored so that not only those seeking careers in the health sciences may benefit from the course, but also those interested in the mechanics of the human body are challenged.

SCI04310 – Biology II: Zoology (CL)

**Prerequisite:**  
One year biology

**Co-requisite:**  
Biology II: Zoology Lab (SCI4310L)

**Credit:**  
1.5 credits

**Offered:**  
Spring

Zoology is a comprehensive survey of the diversity found in Kingdom Animalia. This course addresses the issue of why such diversity occurs, and what factors influence and constrain it. Laboratory explorations of live and preserved specimens allow hands-on examination of the structure and behavior of animals.
SCI04313 – Biology II: Introduction to Nutrition (CL)

Prerequisite: None
Co-requisite: Biology II: Introduction to Nutrition Lab (SCI4313L)
Credit: 1.5 credits
Offered: Fall

This course will explore the general principles of nutrition that are needed for optimal health. The chemical composition of the major macronutrients and micronutrients will be examined. Additionally, the physiology behind proper digestion and absorption of consumed nutrients as well as their use in cellular energy metabolism will be studied. For the laboratory component of the course, the class will learn to comprehend nutrition and food labels, utilize nutrition tracking tools, as well as perform hands-on activities to explore the chemical makeup of food molecules. Current topics in nutrition will be integrated into the course material, such as evaluating the efficacy of dietary trends and gaining helpful strategies to eat healthier as a high school student. This course is highly recommended for students who are interested in increasing their knowledge base about basic nutrition in order to make more informed decisions about leading a healthy lifestyle.

SCI04319 – Biology II: Human Genetics (CL)

Prerequisite: One year biology
Co-requisite: Biology II: Human Genetics Lab (SCI4319L)
Credit: 1.5 credits
Offered: Spring

Human Genetics is an advanced Biology course emphasizing the inheritance of human traits. Specific topics include the inheritance patterns of genes, pedigree analysis, chromosomal aberrations, behavioral genetics, and genetic screening. Laboratory activities emphasize techniques used to detect and analyze genetic information.

SCI04320 – Biology II: Molecular Genetics (CL)

Prerequisite: One year biology
Co-requisite: Biology II: Molecular Genetics Lab (SCI4320L)
Credit: 1.5 credits
Offered: Spring

Molecular Genetics is an advanced Biology course emphasizing the structure of DNA and biotechnology techniques. Specific topics include the modular structure of DNA and proteins, the relationship between DNA mutations and cancer, and the molecular techniques used in forensics and biotechnology. Laboratory activities will provide students the opportunity to perform some commonly used techniques in molecular genetics.

SCI04321 – Biology II: Field Botany (XC)

Prerequisite: One year biology
Co-requisite: Biology II: Field Botany Lab (SCI4321L)
Credit: .75 credit
Offered: Quarter 1

This course will emphasize the diversity found within the plant kingdom at differing levels of the classification. Topics covered will include Plant Anatomy, Morphology, Systematics and Taxonomy. Both non-vascular and vascular plants will form the basis of our study. Laboratory explorations will be organized around the study of the structure and function of plants and the organs. This is a field course that will emphasize knowledge of the local flora as models for plant study.

SCI04322 – Biology II: Horticulture (XC)

Prerequisite: One year biology
Co-requisite: Biology II: Horticulture Lab (SCI4322L)
Credit: .75 credit
Offered: Quarter 2

Horticulture is an area of applied botany. This quarter course will introduce students to the basic care of houseplants, plant reproduction techniques and the study of special groups of plants such as medicinal plants and carnivorous plants. The labs will emphasize a hands-on approach with activities in the greenhouse or with plants grown on light stands.
SCI04324 – Biology II: Intro to Bioethics (XC)

Prerequisite: One year biology
Credit: .5 cr.
Offered: Quarter 4

The ethical basis for the use of scientific knowledge is explored during this course. Students will explore ethical issues resulting from the application of scientific knowledge to solve problems in today’s world. Our priority will be the promotion and development of informed citizens and leaders who can use scientific information to cope with science related issues. The focus of the course revolves around such issues as energy resource problems, sustainability, the bioethics of genetic engineering, medical practices and death and dying. We hope to expand students’ horizons and understanding of science by exposing them to a variety of issues using selected readings. This course does not satisfy the Academy lab science requirements.

SCI04328 – AP Environmental Science II (CL)

Prerequisite: One year biology
Co-requisite: AP Environmental Science Lab (SCI4328L)
Credit: 1.5 credits
Offered: Spring

The study of environmental science concerns itself with the interaction between humans and the ecosystems, in which we live and work. The course focuses on the determination of environmental quality through a series of laboratory experiences dealing with soil, water, and air resources. There is a concentration on problems having to do with population, pollution, agriculture, resource management and land use. An integrated approach to the issues facing us is emphasized. The course will use a problem-based learning approach and will incorporate a service learning component. Students will prepare for and are encouraged to take the AP Environmental Science exam in May.

SCI04329 – Biology II: Sport and Exercise Physiology (CL)

Prerequisite: One year biology
Co-requisite: Biology II: Sport and Exercise Physiology Lab (SCI4329L)
Credit: 1.5 credits
Offered: Spring

This course will explore the human body’s physiological response to acute exercise and exercise training. The main systems of the body (musculoskeletal, cardiovascular, respiratory, endocrine, and nervous) and cellular energy metabolism will be examined at rest through maximal exercise. Additionally, how the main systems of the body adapt to exercise training will be described. The laboratory activities will demonstrate how human fitness and performance are measured. Current topics in sport and exercise physiology will be integrated into the course material. Students will appreciate how exercise and physical activity are essential for optimal human health. Students interested in exploring careers in health and medical fields are encouraged to take this course.
SCI04406 – The Solar System (DC)  *Available for College Credit (see pg. ii)
Prerequisite:  None
Co-requisite:  The Solar System Lab (SCI4406L)
Credit:  1.5 credits
Offered:  Fall

This course is a survey of the solar system based on modern data obtained from NASA and ESA probes. Students are introduced to the basic concepts of planetary science. These concepts include elements of geology and meteorology. The planets, their satellites, and the sun are examined in detail from a planetary science point of view. Other solar system objects such as asteroids and comets are examined as a class. In addition the general motions of bodies in the solar system are examined.

*Ball State University offers 3 college credit hours in ASTRO 100 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

SCI04407 – Galactic Astronomy (DC)  *Available for College Credit (see pg. ii)
Prerequisite:  Algebra I
Co-requisite:  Galactic Astronomy Lab (SCI4407L)
Credit:  1.5 credits
Offered:  Spring

This course introduces students to modern astronomy, its historical roots, and its place as a branch of modern physics. Physics topics include gravitation and the motion of celestial bodies, the relation of electromagnetism to light and thermodynamics and their application to astronomy, modern telescopes and their historical roots. Other topics include the structure of the sun and stars, binary stars, the distance to stars, the birth life and death of stars, neutron stars, black holes, the Milky Way, other galaxies, cosmology and the “Big Bang” theory.

*Ball State University offers 3 college credit hours in ASTRO 120 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.
RES3000S – Research Science I & II (XC)

Prerequisite: Spring - Successful completion of first semester Research Science I
Credit: 1 credit per semester
Offered: Fall/Spring Sequence

In the first semester of this course the basic principles of research are covered, and the student is expected in the second semester to develop a research project which is to be presented through a written document and oral presentation. Students interested in developing an original in-depth research idea are encouraged to submit a grant proposal. Students are encouraged to continue their project for a second semester and present it at one of the venues available.

SCIENCE: APPRENTICESHIP

APR – Apprenticeship Science Laboratory Assistant

Prerequisite: Permission of Instructor
Credit: .5 or 1 credit per semester
Offered: Fall and/or Spring

The Teaching/Laboratory Assistant program allows students to explore a college major or career interest by working with a professional for a period of time. The emphasis is on applied work experience that enables students to learn more about a potential college major or career choice. Students can earn one half credit (30 hours during the semester) or a full credit (60 hours during the semester). Students may schedule with Instructor of Record the times of service as needed to complete the credit requirements necessary to earn Elective Science Credit. Assistantships may begin at different points during the semester.

SCIENCE: BALL STATE UNIVERSITY COURSES

Ball state courses such as the following may be taken on a space-available basis. The academy is not responsible for fees associated with these courses.

<table>

Enrollment into Burris classes (BUR prefix) is subject to space availability. Burris courses meet five days a week and could conflict with other Academy choices. Burris courses are also subject to additional course fees. Courses taken to fulfill graduation requirements will be covered by the Academy. Fees for courses taken for student interest are the responsibility of student and their family.

**BURA118 – Design Fundamentals (Formerly Introduction to Two-Dimensional Art) (CP)**

- **Prerequisite:** None
- **Credit:** 1 credit in Fine Arts
- **Offered:** Fall

*Design Fundamentals* introduces students to fundamental design theory. Investigations into design theory and color dynamics will provide experiences in applying design theory, ideas, and creative problem solving in the area of communication technology. Student learning experiences encompass art history, art criticism, aesthetics, and production, which lead to the creation of portfolio-quality works. Students reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art in the areas of communication; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills.

**BURA0105 – Ceramics (CP)**

- **Prerequisite:** Introduction to Two-Dimensional Art (L) / Design Fundamentals
- **Credit:** 1 credit in Fine Arts
- **Offered:** Fall

*Ceramics* is a course based on the Indiana Academic Standards for Visual Art. Students in ceramics engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production and lead to the creation of portfolio quality works. Students create works of art in clay utilizing the processes of hand building, molds, wheel throwing, slip and glaze techniques, and the firing processes. They reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.

**BURA0105A – Ceramics II (CP)**

- **Prerequisite:** Ceramics
- **Credit:** 1 credit in Fine Arts
- **Offered:** Spring

*Ceramics* is a course based on the Indiana Academic Standards for Visual Art. Students in ceramics engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production and lead to the creation of portfolio quality works. Students create works of art in clay utilizing the processes of hand building, molds, wheel throwing, slip and glaze techniques, and the firing processes. They reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.

**BURA0107 – Drawing (CP)**

- **Prerequisite:** Introduction to Two-Dimensional Art (BURA0101)
- **Credit:** 1 credit in Fine Arts
- **Offered:** Spring

*Drawing* is a course based on the Indiana Academic Standards for Visual Art. Students in drawing engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production and lead to the creation of portfolio quality works. Students create drawings utilizing processes such as sketching, rendering, contour, gesture, and perspective drawing and use a variety of media such as pencil, chalk, pastels, charcoal, and pen and ink. They reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.
### BURA0108 – Painting (CP)

**Prerequisite:** Introduction to Two-Dimensional Art (BURA0101)

**Credit:** 1 credit in Fine Arts

**Offered:** Spring

*Painting* is a course based on the Indiana Academic Standards for Visual Art. Students taking painting engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production that lead to the creation of portfolio-quality works. Students create abstract and realistic paintings, using a variety of materials such as mixed media, watercolor, oil, and acrylics as well as techniques such as stippling, gouache, wash, and impasto. They reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.

### BURA0109 – Printmaking (CP)

**Prerequisite:** Introduction to Two-Dimensional Art (L) / Design Fundamentals

**Credit:** 1 credit in Fine Arts

**Offered:** Spring

*Printmaking* is a course based on the Indiana Academic Standards for Visual Art. Students in printmaking engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production that lead to the creation of portfolio-quality works. Students apply media, techniques, and processes with sufficient skill to communicate intended meaning. They create abstract and realistic prints using a variety of materials such as linocut, woodcut, stencil, silkscreen, photo silkscreen, and mono-print. They utilize processes such as etching, relief, and lithography to explore a variety of ideas and problems. Students reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.

### BURA0111 – Jewelry (CP)

**Prerequisite:** Introduction to Two-Dimensional Art (L) / Design Fundamentals

**Credit:** 1 credit in Fine Arts

**Offered:** Spring

*Jewelry* is a course based on the Indiana Academic Standards for Visual Art. Students in jewelry engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and production that lead to the creation of portfolio-quality works. Students create works of jewelry design and fabrication techniques including sawing, piercing, filing, and soldering. They reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Students utilize the resources of art museums, galleries, and studios, and identify art-related careers.

### BURA0114 – Advanced Placement Studio Art (CP)

**Prerequisite:** Successful completion of 2 studio visual arts courses: Intro 2D Art/Design Fundamentals, Drawing, Printmaking, Ceramics, Jewelry, or Sculpture; teacher recommendation suggested

**Credit:** 1 credit in Fine Arts per semester

**Offered:** Fall and Spring

The AP Studio Art portfolios are designed for students who are seriously interested in the practical experience of art. AP Studio Art is not based on a written exam; instead, students submit portfolios for evaluation at the end of the school year. The AP Studio Art Program consists of three portfolios: 2-D Design, 3-D Design and Drawing — corresponding to the most common college foundation courses.
ACADEMY / BURRIS: MUSIC

ACADBAND – Advanced Concert Band (CP)

**Prerequisite:** Beginning and Intermediate Concert Band (Recommended)

**Credit:** 1 credit per semester. The nature of this course allows for successive semesters of instruction at an advanced level provided that defined proficiencies and content standards are utilized.

Counts as a Directed Elective or Elective for all diplomas.

Fulfills a Fine Arts requirement for the Core 40 Academic Honors Diploma.

**Offered:** Fall and Spring

---

**Advanced Concert Band** is based on the Indiana Academic Standards for High School Instrumental Music. This course provides students with a balanced comprehensive study of music through the concert band, which develops skills in the psychomotor, cognitive, and affective domains. Ensemble and solo activities are designed to develop elements of musicianship including tone production, technical skills, intonation, music reading skills, listening skills, analyzing music, studying historically significant styles of literature, and integration of other applicable disciplines. Experiences include improvising, conducting, playing by ear, and sight-reading. Students develop the ability to understand and convey the composer’s intent in performance of music. Time outside of the school day may be scheduled for rehearsals and performances. A limited number of public performances may serve as a culmination of daily rehearsal and musical goals. Students are required to participate in performance opportunities outside of the school day that support and extend learning in the classroom.

---

BURCHOIR – Advanced Chorus (CP)

**Prerequisite:** Beginning and Intermediate Chorus (Recommended)

**Credit:** 1 credit per semester. The nature of this course allows for successive semesters of instruction at an advanced level provided that defined proficiencies and content standards are utilized.

Counts as a Directed Elective or Elective for all diplomas.

**Offered:** Fall and Spring

---

**Advanced Chorus** is based on the Indiana Academic Standards for High School Choral Music. Students taking Advanced Chorus develop musicianship and specific performance skills through ensemble and solo singing. This class includes the study of quality repertoire in the diverse styles of choral literature appropriate in difficulty and range for the students. Chorus classes provide opportunities for performing, creating, and responding to music. Students develop the ability to understand and convey the composer’s intent in performance of music. Time outside of the school day may be scheduled for rehearsals and performances. A limited number of public performances may serve as a culmination of daily rehearsal and musical goals. Students are required to participate in performance opportunities outside of the school day that support and extend learning in the classroom.

---

BUSTRING – Advanced Orchestra (Strings Only) (CP)

**Prerequisite:** Beginning and Intermediate Orchestra (Recommended)

**Credit:** 1 credit per semester. The nature of this course allows for successive semesters of instruction at an advanced level provided that defined proficiencies and content standards are utilized.

Counts as a Directed Elective or Elective for all diplomas.

**Offered:** Fall and Spring

---

**Advanced Orchestra** is based on the Indiana Academic Standards for High School Instrumental Music. Students in this ensemble are provided with a balanced comprehensive study of music through the orchestra, string and/or full orchestra, which develops skills in the psychomotor, cognitive, and affective domains. Ensemble and solo activities are designed to develop and refine elements of musicianship including tone production, technical skills, intonation, music reading skills, listening skills, analyzing music, studying historically significant styles of orchestral literature, and integration of other applicable disciplines. Experiences include improvising, conducting, playing by ear, and sight-reading. Students develop the ability to understand and convey the composer’s intent in performance of music. Time outside of the school day may be scheduled for rehearsals and performances. A limited number of public performances may serve as a culmination of daily rehearsal and musical goals. Students are required to participate in performance opportunities outside of the school day that support and extend learning in the classroom.
INTERDISCIPLINARY STUDIES

GENERAL

BUS0110 – Personal Finance (DC)  
*Available for College Credit (see pg. ii)

Prerequisite: None  
Credit: 1 credit  
Offered: Spring

The fundamental principles of general business and related economic concepts are considered from the consumer’s point of view. General fundamental principles of business, consumer buying, use of credit, banking, insurance, investments, tax concepts, and budgeting will be introduced.

*Ball State University offers 3 college credit hours in FIN 110 to students who complete this course. Refer to the Dual Credit section on the Academy Website for details on enrollment and fees.

COLLOQUIUM

COL03900 – Junior Colloquium (CL)

Prerequisite: None  
Credit: .5 credit in Junior Colloquium  
Offered: Fall

This is a discussion-oriented seminar and is required for all juniors. Students participate in a variety of experiences: small group seminars, large group lectures, large group outings, and medium group simulations as a part of this interdisciplinary series. All students will do a variety of readings on many different content areas as part of this experience.

COL04000 – Senior Colloquium (CL)

Prerequisite: Junior Colloquium (COL3900)  
Credit: .5 credit in Senior Colloquium  
Offered: Spring

This is a discussion-oriented seminar and is required for all seniors. Students participate in small group seminars as part of this interdisciplinary series. All students will do a variety of readings and discussions on selected content areas as part of this experience.
**INTERNSHIPS**

The internship program allows students to explore a college major or career interest by working with a professional for a short period of time. The emphasis is on a work experience that enables students to learn about a potential college major or career choice. Students can earn one half credit (60 hours during the semester) or a full credit (120 hours during the semester). Students may schedule with the internship site the times of internship service as needed to complete the credit requirements necessary to earn elective credit. Internships may begin at different points during the semester. For further information, please contact Mr. Aaron Lake.

**DIRECTED STUDY**

Through a Directed Study, students form linkages with instructors who have expertise in an area of interest for them that cannot be acquired through the Academy curriculum. If students are interested in pursuing a Directed Study, they should first contact the particular instructor with whom they wish to study to determine if the instructor is willing. If the instructor agrees to the Directed Study, then the instructor and the student must complete the Directed Study Proposal form on the Indiana Academy website at [academy.bsu.edu/forms](http://academy.bsu.edu/forms). No student may take a Directed Study if their need may be met through an Indiana Academy course offering unless an explicit need or conflict can be demonstrated. Students wishing to enroll in a Directed Study must be at least a second semester junior. The Directed Study must be approved by the instructor, Division Chair, and Director of Academic Affairs. This approval process automatically occurs once the proposal is submitted online.
